

# Trounceflow Countries: Brazil

Michael Trounce

December 11, 2019

## **Abstract**

The ‘Trounceflow Countries’ series of ‘living’ documents provide real-time dynamic summaries of macroeconomic data relevant to the flows-and-positions analysis of emerging market debt. These macroeconomic data concentrate on the structure of the government bond market but also include other useful but hard-to-wrangle data such as the structure of the local institutional investor base. The data is obtained from the Trounceflow App ([trounceflow.com](http://trounceflow.com)) and the document data is automatically updated in line with the automatic updates on the App; links to the underlying national sources are also given in the ‘living’ documents.

The values presented in this report are the face values of the bonds
