

Trounceflow Countries: Egypt

Michael Trounce

December 2, 2019

Abstract

The ‘Trounceflow Countries’ series of ‘living’ documents provide real-time dynamic summaries of macroeconomic data relevant to the flows-and-positions analysis of emerging market debt. These macroeconomic data concentrate on the structure of the government bond market but also include other useful but hard-to-wrangle data such as the structure of the local institutional investor base. The data is obtained from the Trounceflow App (trounceflow.com) and the document data is automatically updated in line with the automatic updates on the App; links to the underlying national sources are also given in the ‘living’ documents.

The values presented in this report are the face values of the bonds
